A **WORLD FUTURE ENERGY** EVENT

## About the EUROPEAN **FUTURE ENERGY** FORUM

The European Future Energy Forum is an initiative developed with Masdar (Abu Dhabi's multi-faceted, multi-billion dollar investment in the development and commercialisation of innovative technologies in renewable, alternative and sustainable energies) and part of the Future Energy Event series of events that includes the World Future Energy Summit held annually in Abu Dhabi.

The first European Future Energy Forum was launched with great success in 2009 at the Bilbao Exhibition Centre, Spain and saw 3,638 attendees from 43 countries worldwide attend. The format of the event is based on creating a vibrant environment where high-level debate can take place through a large conference platform, as well as knowledge exchanging workshops, small round table discussions and international networking and business meetings.

We are looking for businesses and organisations that have solutions and business opportunities for the global renewable energy and environmental technology market to participate in this event.

EXHIBIT	SPONSOR	SPEAK	DEMONSTRATE	PROMOTE
Take a stand to demonstrate products or hold private meetings with international clients	Promote your brand to investors in renewable energy and energy efficiency	Share a platform with the world's leading experts or host a round table session of your own	Show off your technology, designs and innovative concepts within one of our workshop theatres or exhibition feature areas	Become part of the EFEF campaign through a media partnership with us

### CONTACT US NOW & **GET INVOLVED...**

Call +44 (0) 203 086 8405 or email [info@EuropeanFutureEnergyForum.com](mailto:info@EuropeanFutureEnergyForum.com)

## Who will attend?

This forum will bring together top influential figures within the renewable energy industry including:

- Top European Government Officials/Ministers
- NGOs and Environment Agencies
- Venture Capitalists and Investors
- Energy Companies and Professionals
- Architects, Developers and Civil Engineers
- Transport Providers and Manufacturers
- Consultants and Advisors
- Media Broadcasters and Journalists

## The format for the forum

## Why Exhibit?

**With 5,000 attendees expected to attend this forum you will be able to truly network and share knowledge within an open and relaxed environment.**

The exhibition hall is the meeting place for round table sessions, networking lunches, refreshment breaks and your own private business meetings.

This is an opportunity to:

- Host round table debates and technical poster sessions
- Launch and demonstrate new technology, products and services
- Meet potential buyers and industry figures face-to-face in one place at one time
- Do deals and arrange private business meetings through the event
- Gain feedback and collect market research
- Promote your brand to a European audience
- Build prospect databases and generate sales leads
- Position your company as a market leader

**PLUS benefit from our extensive European Future Energy Forum promotional campaign (details available on request).**

## Why Sponsor?

The forum offers you the opportunity to position your brand alongside leading experts in the field of renewable energy and environmental technology. By supporting this important event, you will be able to connect with the highest level of international decision makers within this global market. We are happy to put together a package that meets your needs and budget so that you can maximise your business opportunities in this sector.

For overseas companies contact  
**Mario Goffard**, Event Director  
 on +34 94 404 00 98  
 or email [mgoffard@bec.eu](mailto:mgoffard@bec.eu)

***'The UK has one of the most vibrant and internationally valued renewable energy and environmental technology sectors in the world.'***

## Why London?

The UK is making major strides in decreasing its global carbon footprint being the world's second biggest investment location for renewable energy firms.

The UK has one of the most vibrant and internationally valued renewable energy and environmental technology sectors in the world.

This has been achieved through progressive government policies, innovative and experienced companies, and vast natural renewable energy resources.

The Government's aim to reduce CO2 emissions by at least 80% in greenhouse gas emissions by 2050 offers a robust framework for continued investment in the UK.

Onshore and offshore wind, biomass, wave and tidal energy are just some of the renewable energy sectors presenting opportunities for investment.

### PLUS...

- It's easy to get to – London is serviced by 5 international airports with excellent road and rail connections
- ExCeL provides world-class facilities with high-quality and affordable accommodation
- Through the UKTI, the UK government are really backing this event to ensure it's a great success.
